Experience

Full Stack Developer | Inmet | 2017 - Current

Inmet is part of the government from Brazil and is responsible, mostly, for the meteorological forecast.
I was responsible for the migration of legacy systems made in PHP to new technologies as react and node.
I also worked with React Native and made some Apps like Inmet App.
All the new systems are made with JavaScript, React and Node.
The APIs are made with REST to any system or user be able to search any information they want.
At the react's frontend I used Hooks, Redux and Context API.
At the react native mobile app, I used the APIs already done and Redux for the data sending between views.
Some of the old systems need to have their data preserved, so I made scripts Python to migrate their data to the new database with the necessary adjusts.

Worked with: HTML5, CSS, JavaScript, TypeScript, PHP, Python, Scrum, Kanban, PostgreSQL, MySql, ReactJS, Node.JS, Yii2, React Native and Adonis.JS.

Intership Developer | Senado Federal (Interlegis) | 2015 - 2017

I was responsible for maintenance of a LMS called Saberes and worked in the development of the new SAPL with another five partners using Scrum and Kanban to control the tasks.
With the system made in Django & Python, I had autonomy to develop features by myself and revise codes from pull request, because the code was all in the Github to the community help it.

Worked with: HTML5, CSS, JavaScript, Scrum, PHP, Moodle, Python, PostgreSQL, Docker and Django.

Intership Developer | BEPiD | 2014

BEPiD is an initiative of Apple with the university to bring more iOS developers to job market.
There I was prepared for one year through a course where I needed to develop apps.

Worked with: Objective-C

Education

Universidade Católica de Brasília
Bachelor of Computer Science
2013 - 2018

Certificates

Adobe Package - 408h
Advanced HTML - 6h
Basic Concepts of Node.js, ReactJS and React Native - 10h
Data Science with Python - 2h
Good Habits PHP - 30m
Introduction of GraphQL - 15h
JavaScript n TypeScript - 145.5h
Sass Basic to Advanced - 12.5h
Testing React with Jest and Testing Library - 8h
Testing JavaScript n React with Jest and Enzyme - 9.5h
Training of Objective-C - 1000h

English - C1
https://www.efset.org/cert/ddkiYW

Skills

Hard:

CSS	GraphQL	Git
Django	Moodle	jQuery
HTML	MySQL	
JavaScript	Oracle	
Node.JS	React Native	
PHP	Jest	
PostgreSQL	Testing Library	
Python	Context API	
ReactJS	Rest API	
Redux	Scrum	
TypeScript	Kanban	
WordPress	Sass	

Learning next:

.NET
AWS
Angular
C#
Java
NoSQL
